

Our recent achievement on:

DIGITAL HOSPITAL INITIATIVES

An innovation award for a management system created by SAME.

Ms. Rahmiyati Yahya, the Corporate Secretary of SAME, represented SAME to receive the innovation award at The IDX Channel Anugerah Inovasi Indonesia 2022.

Our Innovation, DoMINoS.

In light of the company's goal to become a group of digital hospitals, SAME has created and implemented an internal management system known as the Document Management Information System (DoMINoS).

DoMINoS is independently developed by SAME and intended to be used internally as an effort to build and provide a collection of documents and information in an organized digital form that can be accessed by all employees of EMC Healthcare hospital group, including the corporate management and medical personnel.

Up to this point, DoMINoS has had a significant impact on SAME, where it facilitates the employees to access references prior to making internal decisions, strengthens the security of hospital internal documents, and simplifies the literature search about patient safety, internal regulations, and hospital legislation which becomes more accessible.

IDX Channel Award.

After previously presenting to the jury and also going through the assessment process, on 24 August 2022, SAME received an award from IDX Channel for its innovation in the category of internal process, namely DoMINoS.

The award recipients at The IDX Channel Anugerah Inovasi Indonesia 2022.

It is an honor for SAME to be recognized and rewarded in such a way. Through this IDX Channel Award, SAME aims to create more innovations in the future that are beneficial not only for its employees, but also for the public.
